

TAQA Arabia

Fleet & Mobility Sector

Integrated Energy & Mobility Solutions · Jun 2026

A World of Energy, Delivered End-to-End

- Founded in 2006 and listed on the EGX since 2023, TAQA Arabia is Egypt's largest private-sector energy and utility developer.
- Across four divisions — Gas, Power, Petroleum and Water — TAQA finances, builds, owns and operates the utility backbone of residential communities, industrial zones and touristic destinations.
- TAQA is uniquely positioned to support different mobility solutions to fuel vehicles with different energy sources such as petroleum products, lubes, electricity for EVs and natural gas for NGVs

Active member of the International Gas Union (IGU)

Accredited by the IGEM (Institution of Gas Engineers & Managers)

Gas

- Gas distribution & EPC networks
- NGV stations & car conversion
- Mobile CNG & LNG (virtual pipeline)

Petroleum

- Oil-marketing stations & terminals
- Lubricants retail & distribution
- Bulk fuel storage & logistics

Power

- Generation & distribution (+1,600 MVA)
- Renewable energy & solar PV
- EV charging stations

Water

- Reverse-osmosis desalination
- Filtration & chemical treatment
- Smart, solar-powered operations

Presence Across Africa & the Middle East

Actual presence and markets under study across Africa & the Middle East — extending TAQA's integrated energy model well beyond Egypt.

Fuel Terminals in Suez and Alexandria

The Fleet Operator's Challenge

Fuel Is the Biggest Lever

Fuel is typically 30–50% of fleet operating cost — small per-litre moves swing the entire P&L.

Volatile, Unpredictable Prices

Diesel and petrol track global oil and policy — budgeting fuel becomes guesswork year to year.

Tightening Emissions Pressure

ESG targets, low-emission city zones and customer mandates are closing in on combustion fleets.

Fragmented Suppliers

Fuel, gas, chargers and telematics from separate vendors means many contracts and no single view.

The Mobility Energy Pathway

Diesel today, natural gas as the bridge, electric as the destination — at your pace

TAQA finances and manages each step, so the fleet moves down the cost-and-carbon curve at its own pace — never stranded, never forced.

Down the cost-and-carbon curve: each step lowers cost per kilometre and tailpipe emissions — financed and staged by TAQA, at your pace.

Fuel Stations

01

Keep today's fleet moving — diesel and gasoline from a nationwide TAQA-operated station network and two terminals

Natural Gas (CNG)

02

Convert the fleet you own to gas — and fuel it: licensed NGV conversion plus TAQA's CNG network and the Master Gas mobile virtual pipeline

EV Charging

03

Electrify with the holder of Egypt's first private EV-charging licence — depot, destination and en-route AC/DC charging, end-to-end

Waqood Smart System

04

See and control the whole fleet from one screen — TAQA's EnerTech platform that digitalizes fueling, spend and control

SCOPE

TAQA funds, builds, owns & operates the asset.

You pay only for the fuel you draw — little to no upfront CapEx.

1 TAQA INVESTS THE CAPEX

Forecourt, tanks & dispensers · Canopy, shop & safety systems · Automation, POS & fuel-management · Fleet cards & telemetry · Station financing & licensing

2 THE PROCESS — STEP BY STEP

- 1 TAQA secures the licence and builds the station to spec.
- 2 Tanks, dispensers and automation are installed and certified.
- 3 Fleet vehicles fuel using cards linked to each driver and vehicle.
- 4 Every litre is captured digitally against limits and rules.
- 5 TAQA supplies fuel, runs the site and reports consumption.

3 WHAT YOU RECEIVE

- Reliable fuel supply for your fleet
- Controlled, card-based fuelling
- Full station operation and reporting

**172 stations
added**

VALUE PROPOSITION

WHAT YOU GAIN

Depot & On-Site Fueling

Bulk and on-site delivery keep heavy fleets fueled at base — no detours, no queueing at the pump.

Spec-Compliant Supply

Quality-assured fuel from owned terminals protects engines, warranties and resale value.

Predictable Fuel Spend

Consolidated billing and consumption reporting turn fuel from a blind cost into a managed, forecastable line.

A Single Point of Contact

One TAQA account team handles fuel, delivery and logistics — no juggling multiple suppliers.

THE TAQA ARABIA EDGE

Assured Fuel Quality

Two owned terminals and a controlled logistics chain mean traceable, spec-compliant fuel that protects engines.

Nationwide Fueling Reach

TAQA's own stations plus 172 newly managed Wataniya sites mean drivers refuel wherever the route goes.

A Ready Transition Partner

The partner fueling you today is the one that converts you to CNG and electrifies you tomorrow.

One Cashless Account

A single fuel account replaces cash and scattered receipts — every liter logged to the right vehicle.

IMPLEMENTATION TIMELINE — START TO FINISH

SET UP *Day 0-14*

Fleet profiling, account and credit terms, station-access activation and a depot fuelling survey.

DEPLOY *Day 14-30*

On-site and bulk fuelling installed where required; cashless refuelling across the national network goes live.

MANAGE *Ongoing*

Consolidated monthly billing, consumption analytics and periodic route and spend optimisation reviews.

A fuel-marketing network built over two decades — and growing fast

TAQA Petroleum was the first privately owned Egyptian company licensed to supply fuel, operating its own retail stations and two storage terminals in Suez and Alexandria. In 2026 it took over management of 172 Wataniya stations through Quick Fuel — a major step-change in reach. It is the dependable foundation that keeps commercial fleets fuelled today, and the same accredited partner behind the gas and EV infrastructure of tomorrow.

230

Wataniya stations now managed + Own Stations

1st

private fuel licence in Egypt

2

owned storage terminals

43+

Terminal Capacities in Liters

SCOPE

TAQA funds, builds, owns & operates the asset.

You pay only for the gas you fuel with — little to no upfront CapEx.

1 TAQA INVESTS THE CAPEX

CNG mother & daughter stations · Compression & dispensing skids · Vehicle conversion workshops · Virtual-pipeline trailers · Station financing

2 THE PROCESS — STEP BY STEP

- 1 TAQA converts fleet vehicles to run on compressed natural gas.
- 2 Gas is compressed and dispensed at TAQA CNG stations.
- 3 Where no pipeline exists, trailers supply gas as a virtual pipeline.
- 4 Drivers fuel with cards that log every fill.
- 5 TAQA maintains stations, skids and converted vehicles.

3 WHAT YOU RECEIVE

- Lower-cost CNG fuel for the fleet
- Conversion and refuelling network
- Managed supply, even off-pipeline

**Cheaper
per km**

VALUE PROPOSITION

WHAT YOU GAIN

~40% Lower Fuel Cost

CNG is structurally cheaper than petrol and diesel — the single fastest lever on operating cost.

Bi-Fuel & Fully Certified

Bi-fuel keeps petrol as a fallback; conversions, cylinders and stations are licensed and periodically re-tested.

Fastest Payback

Conversion cost is typically recovered within months from fuel savings — then it is pure margin.

Cleaner, Quieter Engines

Natural gas cuts particulates, NOx and engine noise — better for cities, drivers and ESG.

THE TAQA ARABIA EDGE

Convert + Fuel, One Partner

TAQA both converts the vehicle and fuels it — one accountable provider across the whole gas switch.

Conversion Workshops

In-house facilities convert and certify fleet vehicles 20 Conversion Centers Located Across Egypt

Master Gas CNG

A real, operating CNG network plus a mobile virtual pipeline that fuels depots with no fixed connection.

No Pipeline, No Problem

Master Gas brings natural gas to remote depots in days — no waiting years for a fixed connection.

IMPLEMENTATION TIMELINE — START TO FINISH

ASSESS *Day 0-20*

Profile routes and gas demand, identify which vehicles to convert, and choose dedicated-CNG or bi-fuel plus the fuelling mix.

CONVERT & SUPPLY *Day 20-65*

Licensed conversion, cylinder fitting and safety sign-off, then switch the fleet onto live CNG via stations or Master Gas.

OPERATE *Ongoing*

SCADA-monitored dispatch, uptime assurance, cylinder certification and periodic re-testing.

Convert and fuel — run by the operator of the gas network

Through its Gas division, TAQA Arabia operates 86 CNG stations, runs licensed vehicle-conversion centres, and pioneered mobile CNG in Egypt under the Master Gas brand — a virtual pipeline to sites with no fixed gas infrastructure. Because one partner both converts vehicles and fuels them, natural gas becomes the lowest-cost, lowest-disruption fuel switch a fleet can make.

86

~40%

lower fuel cost (illustrative)

SCOPE

TAQA funds, builds, owns & operates the asset.

You pay only for the energy you charge — little to no upfront CapEx.

1 TAQA INVESTS THE CAPEX

Depot AC / DC fast chargers · Grid connection & transformer upgrades · Smart charge-management system · Driver app, RFID & billing · Charger financing

2 THE PROCESS — STEP BY STEP

- 1 TAQA sizes depot and route charging to fleet duty cycles.
- 2 Chargers and grid upgrades are installed at depots and hubs.
- 3 Smart scheduling charges vehicles overnight at lowest cost.
- 4 Drivers authenticate; every kWh is logged per vehicle.
- 5 TAQA operates, maintains and reports on the network.

3 WHAT YOU RECEIVE

- Depot and en-route charging ready to use
- Optimized, low-cost charging windows
- Maintained uptime with full reporting

**Depot
to road**

VALUE PROPOSITION

WHAT YOU GAIN

Lowest Energy Cost / Km

Electricity per kilometer undercuts both diesel and petrol — the end-state of the cost curve.

Future-Proofed Fleet

Charging positions the fleet ahead of regulation, fuel bans and customer demand.

Zero Tailpipe Emissions

A genuinely zero-emission fleet — the strongest possible ESG and city-access position.

Managed Uptime & App

Lifecycle O&M, an operator/user app and a 24/7 hotline keep every charger available and billing.

THE TAQA ARABIA EDGE

Flexible Financing Options

TAQA can fund the whole charging network under a profit-share model — zero charging capex for you.

Depot-to-Highway Coverage

Overnight depot AC plus en-route DC fast charging — both the base and the road are covered.

Grid Capacity Secured

The power-distribution arm de-risks the hardest part of EV adoption — getting power to site.

One Energy Partner

Charging integrates with TAQA's fuel and CNG offering — one partner across the whole transition.

IMPLEMENTATION TIMELINE — START TO FINISH

DESIGN *Day 0-30*

Grid survey, fleet duty-cycle analysis and charger-mix design, plus commercial structuring under the full-investment model.

BUILD *Day 30-110*

Procure AC/DC chargers and grid equipment, install at depot and en-route, tie into grid, onboard the app and go live.

OPERATE *Day 110+*

Lifecycle O&M and guaranteed uptime, backed by the operator/user app and the 24/7 TAQA hotline.

Pioneering Egypt's EV-charging rollout from the front

TAQA Power secured Egypt's first private EV-charging licence and is rolling out AC and DC charging across depot, commercial and highway locations, supported by an operator/user app and a 24/7 hotline. As Egypt's largest private power distributor with 130 chargers capacity, TAQA pairs charging with the grid, solar and storage — the complete electrification package for any fleet.

app & hotline support

TAQA funds, builds, owns & operates the asset.

You pay only for the fuel you authorize — little to no upfront CapEx.

1 TAQA INVESTS THE CAPEX

Vehicle RFID tags & stickers · Driver PIN & access devices · Station-side reader integration · Waqood platform & dashboards · Onboarding & configuration

2 THE PROCESS — STEP BY STEP

- 1 Vehicles, drivers and rules are configured in the Waqood platform.
- 2 RFID stickers and driver PINs are issued and linked.
- 3 At the pump, the system verifies vehicle, driver and limit.
- 4 Only authorized fuelling within set limits is allowed.
- 5 Every transaction streams to live dashboards and reports.

3 WHAT YOU RECEIVE

- Total control over fleet fuelling
- Real-time consumption dashboards
- Leakage and fraud designed out

Every litre tracked

VALUE PROPOSITION

WHAT YOU GAIN

One Dashboard

Liters, m³ of gas and kWh charged appear in a single dashboard — true total-energy visibility.

Fraud Designed Out

Per-driver PINs, daily limits and pump-reading capture make unauthorized or phantom fueling almost impossible.

Decisions From Data

Live consumption and behavior analytics show exactly where cost and waste sit across the fleet.

Higher Asset Utilisation

Consumption and behavior data surface idle, thirsty and inefficient vehicles to fix.

THE TAQA ARABIA EDGE

Waqood by EnerTech

Waqood is TAQA Arabia's own energy-technology company — the platform is owned, not rented.

TAQA Arabia Diverse Network

Utilize TAQA Arabia Diverse network of CNG and fuel and EV stations scattered Across Egypt

One platform for all energy types

supports a client's transition from diesel today → CNG tomorrow → EV in the future under a single provider

Premium Customer Support

Dedicated account management and a single communication channel ensure fast issue resolution, proactive support, and a seamless experience

IMPLEMENTATION TIMELINE — START TO FINISH

ONBOARD *Day 0-14*

Scope vehicles, drivers and rules, then configure stickers, per-driver PINs and per-vehicle daily limits.

ACTIVATE *Day 14-30*

Connect fuel, CNG and EV-charging data and bring the single-pane dashboard and consolidated billing live.

OPTIMISE *Ongoing*

Refine limits and alerts, and run continuous consumption, fraud, ESG and savings analytics.

Egypt's smart fuel platform, built inside TAQA Arabia

Waqood is TAQA Arabia's own EnerTech company, built to digitalise fuel payments for fleet operators. A driver scans a vehicle sticker, captures the pump reading and enters a personal PIN before the transaction is approved and invoiced — while managers set daily limits, receive fraud alerts and watch live analytics on a single dashboard. Extended across fuel, CNG and EV, Waqood turns a complex multi-fuel operation into one optimised, fully reported system.

Why One Partner: The TAQA One-Stop-Shop

From Fragmented Vendors to a Single Operator

One SLA

A single service-level agreement governs gas, power, water, back-up and EV — one uptime guarantee, one penalty regime, one renewal.

One Communication Point

A single account team and 24/7 hotline for every utility — no chasing five contractors when something needs attention.

One Commercial Relationship

Consolidated billing, aligned contract terms and a single negotiation instead of six separate procurement cycles.

One Engineering Standard

Utilities designed to interoperate from day one — shared trenches, shared metering platform, shared monitoring.

One Accountable Owner

End-to-end responsibility removes interface risk and finger-pointing between specialised vendors.

The Integrated Economics: Diesel-Only vs. TAQA

Why a managed energy mix beats a diesel-only fleet — and widens the gap every year

TODAY — DIESEL-ONLY FLEET

High, volatile fuel bill

Diesel and petrol are the biggest cost — exposed to every oil-price spike.

Fragmented suppliers

Fuel, gas, chargers and software from separate vendors — no single view.

Fuel leakage & fraud

Cash, paper receipts and no per-vehicle control quietly inflate the bill.

Rising carbon & city risk

100% combustion means maximum emissions and exposure to low-emission zones.

WITH TAQA — INTEGRATED MIX

Up to ~40% lower fuel cost

CNG and EV displace the most expensive litres — predictable, managed pricing (illustrative).

One partner, one account

Fuel, gas, conversion, charging and Waqood under a single SLA.

Leakage designed out

Waqood PINs, limits and verified readings stop unauthorized and phantom fueling.

Falling carbon, every year

Each step down the pathway cuts CO₂ — near-zero once the fleet reaches EV.

The result: a lower and more predictable cost per kilometre, fewer suppliers, controlled fuel spend and a steadily stronger ESG story — from one partner, financed and staged at your pace.

From Pump to Plug: Your Fleet's Energy Partner

From diesel today to electric tomorrow

From pump to plug, TAQA fuels every kilometre your fleet will ever drive.

Egypt's largest private energy developer is the single partner that can move your fleet from diesel today to electric tomorrow — fuel, CNG, conversion, charging and the Waqood platform that ties them together, financed and measured at every step.

What TAQA brings to your fleet:
