Residential Customers

Integrated Energy & Utility Solutions • Jan 2026

Egypt's leading integrated energy infrastructure developer — a true one-stop-shop for residential utilities

A World of Energy, Delivered End-to-End

Founded in 2006 and listed on the EGX since 2023, TAQA Arabia is Egypt's largest private-sector energy and utility developer.

Across four divisions — Gas, Power, Petroleum and Water — TAQA finances, builds, owns and operates the utility backbone of residential communities, industrial zones and touristic destinations.

For a residential developer, that means one accredited partner can deliver gas, electricity, water, back-up power and EV charging under a single relationship.

- *Active member of the International Gas Union (IGU)*
- *Accredited by the IGEM (Institution of Gas Engineers & Managers)*

Gas

- Gas distribution & EPC networks
- NGV stations & car conversion
- Mobile CNG & LNG (virtual pipeline)

Petroleum

- Oil-marketing stations & terminals
- Lubricants retail & distribution
- Bulk fuel storage & logistics

Power

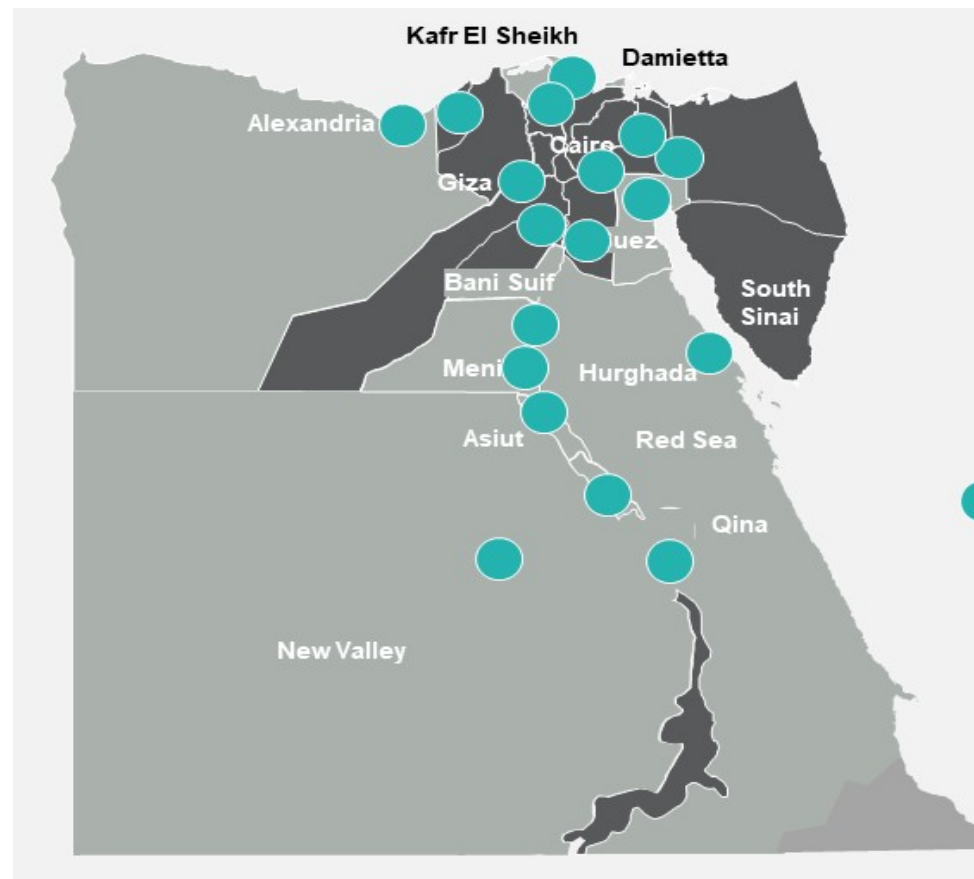

- Generation & distribution (+1,600 MVA)
- Renewable energy & solar PV
- EV charging stations

Water

- Reverse-osmosis desalination
- Filtration & chemical treatment
- Smart, solar-powered operations

A growing platform across Egypt, the GCC, Africa and Greece

Geographic Footprint

Governorates of operation across Egypt — concessions in 8 governorates renewed for 15 years.

Reach & Scale

 8 Countries of presence Egypt, GCC, Africa & Greece	 4 Operating divisions Gas · Power · Petroleum · Water
 20+ Governorates in Egypt Industrial, residential & touristic	 3,400+ Employees Across all divisions

International Expansion

GCC — Partnered and qualified with major players (Al Ghaneim, WETICO) for the Sovereign water-desalination program of up to 800,000 m³/day. **Africa & Greece** — Active development pipeline extending TAQA's integrated energy model beyond Egypt.

Residential Customers · Solutions Overview

The following slides detail every solution TAQA Arabia offers to residential developments

Six integrated solutions — each presented across three slides: **Scope & Value Proposition** → **Client Value & Delivery Timeline** → **Proven Track Record**.

Mobile CNG

01

Off-grid natural gas delivered via mobile virtual pipeline — zero infrastructure capex.

Electricity Distribution

02

Turnkey MV/LV networks, smart metering and licensed lifetime O&M.

Water Desalination

03

Reverse-osmosis plants and digitalized, solar-powered water operations.

Gas Distribution

04

End-to-end gas network EPC — design, build, commission and operate.

Diesel Rental

05

Emergency & back-up power gensets on a flexible rental / OPEX model.

EV Chargers

06

AC, DC and golf-car charging with full-investment green-mobility services.

Portable natural-gas supply delivering cost savings, flexibility and energy security for off-grid residential communities

SCOPE

Mobile CNG Solution

TAQA Arabia delivers portable CNG via MEGC trailers with an integrated pressure-reduction unit — connecting any compound, resort or remote community to natural gas without waiting for a pipeline, at zero infrastructure capex.

What we deliver

- ▶ MEGC trailers (5,700 Nm³ at 250 bar) with optional onboard PRU
- ▶ Mother / Mobile / Daughter virtual-pipeline station chain
- ▶ Capacity-as-a-Service billing (reserved Nm³/day)
- ▶ SCADA real-time monitoring & automatic hot-swap dispatch
- ▶ End-to-end: survey, permitting, deploy, operate & maintain

VALUE PROPOSITION

1

Off-Grid Gas Supply

Reliable natural gas to communities without pipeline access — compounds, resorts and remote developments.

2

No-Capex Delivery Model

BOO / BOOT via Capacity-as-a-Service — no upfront infrastructure cost for the community developer.

3

Cost Savings vs. Diesel & LPG

≈40% lower fuel cost than diesel; replaces LPG and electric heating across the development.

4

Cleaner Emissions

Cuts CO₂ by ~24% vs. diesel and lowers NO_x & particulates — supports ESG and green-rating targets.

5

99.5% Uptime SLA

SCADA-monitored hot-swap replenishment guarantees uninterrupted supply to every home.

6

Scalable to Any Load

Starter (500 Nm³/day) to Heavy (5,000+ Nm³/day) — scales with occupancy, bridges to grid later.

What changes for the client after implementation — and how TAQA delivers it, phase by phase

VALUE ADDED TO THE CLIENT

Immediate Liveability

Hot water, cooking gas and heating from day one — units become sellable and occupiable before the pipeline arrives.

Lower Resident Bills

Natural gas at ~13 EGP/m³ vs. ~20.5 EGP/L diesel translates directly into lower service charges for residents.

Zero Developer Capex

TAQA finances, owns and operates the asset; the developer preserves capital for the core build.

Bridge-to-Grid Security

Covers the typical 2–5-year gap until the national grid reaches new cities and remote zones.

IMPLEMENTATION TIMELINE — START TO FINISH

1

Discovery

Day 0

Lead identification & commercial qualification.

2

Initial Contact

Day 1–3

NDA signed, requirement scoping.

3

Site Audit

Day 4–7

Technical load profiling & demand curve.

4

Contract

Day 8–14

Capacity tier, CaaS pricing & 99.5% SLA.

5

Mobilization

Day 15–30

MEGC & PRU procured and prepared.

6

On-Site Install

Day 90–120

PRU adapter installed, SCADA activated.

7

Live Gas

Day 120–200

Switchover from diesel to live CNG supply.

A show of muscle — what TAQA Arabia has already delivered

Virtual Pipeline — 4 Governorates

First company in Egypt to supply natural gas through a mobile virtual pipeline

TAQA Arabia pioneered mobile CNG in Egypt, using its network of 86 CNG stations to extend a virtual pipeline into four governorates with no fixed gas infrastructure. The same model now serves industrial, residential, touristic and agribusiness clients — proving off-grid communities can run on clean natural gas years before the physical pipeline arrives.

86

Active mobile-CNG clients

Turnkey distribution networks for residential developments — from power sourcing and design through licensed lifetime O&M

SCOPE

Turnkey Power Distribution

TAQA Arabia is the largest private electricity distributor in Egypt. For residential developments it sources power, builds the substation and medium/low-voltage network, installs smart metering, and operates the whole asset under a licensed long-term contract.

What we deliver

- ▶ Power sourcing, government relations & grid MV interconnection
- ▶ Substation development & engineering / load-study approvals
- ▶ MV / LV distribution network design, supply & installation
- ▶ Solar PV & hybrid power integration options
- ▶ Smart metering: supply, install & billing software platform
- ▶ Licensed 24/7 distribution-network O&M

VALUE PROPOSITION

1

Largest Private Distributor

42% private-sector distribution market share and Egypt's first private distribution & generation licenses.

2

Full O&M Service Model

Developer owns the network; TAQA delivers licensed lifecycle operation under a long-term contract.

3

Profit-Share Model

Aligned commercials — developer and TAQA share upside from electricity sales and metering revenues.

4

Demand-Side Management

Smart-meter analytics drive load shifting and peak shaving — lower bills and reduced grid stress.

5

Reliability & Smart O&M

24/7 predictive maintenance and rapid-response teams with guaranteed SAIDI / SAIFI performance.

6

Smart Metering & App

Power & water smart metering with consumption analytics and real-time resident notifications.

Electricity Distribution: Value to the Client & Delivery Timeline

What changes for the client after implementation — and how TAQA delivers it, phase by phase

VALUE ADDED TO THE CLIENT

Guaranteed Power Quality

Stable, metered, billable electricity to every unit from handover — no reliance on stretched public utilities.

A New Revenue Stream

The profit-share model turns the distribution network from a cost centre into recurring income for the developer.

Single Accountable Operator

One licensed party owns sourcing, network, metering and O&M — no finger-pointing between contractors.

Lower Resident Bills

Demand-side management and tariff optimization reduce consumption and end-user charges.

IMPLEMENTATION TIMELINE — START TO FINISH

1

Power Sourcing

Phase 1

Gov. relations, grid interim MV interconnection.

2

Engineering Approval

Phase 2

Load study & engineering drawings approval.

3

MEP Approval

Phase 3

Shop drawings / BOM, FAT & supervision.

4

Value Engineering

Phase 4

Demand planning & techno-commercial solution.

5

Smart Metering

Phase 5

Power & water metering supply & platform.

6

Operation & Maintenance

Phase 6

Licensed lifetime network & meter O&M.

A show of muscle — what TAQA Arabia has already delivered

Powering Egypt's leading residential and mixed-use developments

TAQA Power operates +1,600 MVA of distribution capacity, of which 950 MVA serves 26 mixed-use and residential concessions across 31 million m². Its NABQ (160 MVA) and 6th of October Developers (250 MVA) substations anchor a network serving developers such as Emaar, Ora, City Edge, Marakez and LMD — currently +12,000 customers, targeting 50,000.

Reliable freshwater for residential developments — turnkey reverse-osmosis desalination, smart operations and lifecycle support

SCOPE

Turnkey Desalination & Smart Water

TAQA Arabia delivers guaranteed freshwater security for residential and coastal developments via reverse-osmosis desalination plants and fully digitalized water operations — using technology that consumes up to 50% less power than its peers.

What we deliver

- ▶ Reverse-osmosis (RO) desalination plant design & build
- ▶ Pre-treatment, post-treatment & brine management
- ▶ Energy-efficient pumping: VSDs & PID-controlled networks
- ▶ Solar PV integration on rooftops, tanks & parking
- ▶ IoT monitoring: water quality, smart dosing & tank levels
- ▶ O&M, smart metering & predictive

VALUE PROPOSITION

1

Reliable Freshwater Supply

Guaranteed water security for new developments — independent of grid-utility constraints.

2

50% Lower Energy Use

Advanced energy-efficient desalination plus VSDs, peak-demand control and solar PV cut power use.

3

Cost & Risk Covered by TAQA

BOO / BOOT models with long-term water-purchase agreements — minimal upfront capex.

4

Sustainability & ESG Impact

Solar-powered desalination, brine management and a reduced freshwater-extraction footprint.

5

Smart Operations & Uptime

Real-time monitoring, leak & failure detection and predictive-maintenance dashboards.

6

Resident Experience

Dynamic billing, consumption analytics and real-time notifications via mobile app.

Water Desalination: Value to the Client & Delivery Timeline

What changes for the client after implementation — and how TAQA delivers it, phase by phase

VALUE ADDED TO THE CLIENT

Water Security on Day One

Coastal and desert developments get reliable potable water independent of public-network capacity.

No Capex, Predictable OPEX

TAQA funds and owns the plant; the developer pays a transparent per-m³ rate under a water-purchase agreement.

Green-Rating Enabler

Solar-powered RO and brine management support LEED / green-community certification and ESG goals.

Lifecycle Peace of Mind

Smart O&M, leak detection and predictive maintenance protect uptime for the life of the community.

A show of muscle — what TAQA Arabia has already delivered

Soma Bay — Eco Solar Desalination

Egypt's first & largest eco solar-powered water-desalination plant

On the Red Sea, TAQA Water built Egypt's first green desalination facility powered entirely by renewable energy, using technology that consumes 50% less power than peers. It serves 50,000+ people in the Red Sea Governorate and cuts CO₂ by 8,560 tonnes a year — winning both Sustainable Project of the Year and Power & Water Project of the Year.

End-to-end EPC for natural-gas distribution networks across residential communities and mixed-use developments

SCOPE

Turnkey Gas Network EPC

As Egypt's largest private gas distributor, TAQA Arabia delivers full-scope Engineering, Procurement and Construction for natural-gas distribution networks — from feasibility and route planning through testing, commissioning and lifetime operation of the community network.

What we deliver

- ▶ Feasibility studies & network route planning
- ▶ Detailed engineering & design
- ▶ Procurement of pipes, valves, meters & SCADA
- ▶ Construction & installation of distribution networks
- ▶ Testing, commissioning & handover
- ▶ Integration with power & utility infrastructure

VALUE PROPOSITION

1

25+ Years EPC Experience

Decades of project delivery across Egypt and the wider MENA region.

2

Largest Private Distributor

11.5% national LDC share and 66% of private gas concessions — serving ~6.5M residential customers.

3

In-House Engineering & PMO

Dedicated engineering and project-management teams under one roof.

4

Standards Compliance

Aligned with IGEM, EGAS and international gas-safety standards.

5

Single-Point Accountability

End-to-end EPC ownership — design through commissioning and handover.

6

Integrated Utility Backbone

Gas networks integrated with TAQA's broader power, water and EV offering.

Gas Distribution: Value to the Client & Delivery Timeline

What changes for the client after implementation — and how TAQA delivers it, phase by phase

VALUE ADDED TO THE CLIENT

Piped Gas to Every Home

Residents get safe, metered, always-on natural gas for cooking, heating and hot water.

Higher Property Value

Connection to the national gas grid is a premium amenity that lifts unit sale and rental value.

One EPC Partner

A single accountable party from feasibility to handover removes interface risk for the developer.

Safe & Compliant

IGEM / EGAS-compliant design and construction protect residents and de-risk approvals.

Reliable emergency & back-up power for residential developments — turnkey diesel gensets on a rental / OPEX model with 24/7 O&M

SCOPE

Turnkey Diesel Power Solutions

TAQA Arabia supplies, installs, rents and operates diesel generator sets for emergency and back-up power across residential compounds, clubhouses and community infrastructure — on a flexible rental model with full 24/7 operation and maintenance.

What we deliver

- ▶ Diesel generator supply, sizing & commissioning
- ▶ Synchronization, ATS & switchgear integration
- ▶ Acoustic enclosures, exhaust & cooling systems
- ▶ Fuel storage & bulk distribution
- ▶ Remote monitoring & predictive maintenance
- ▶ 24/7 O&M, spares & rapid-response service

VALUE PROPOSITION

1

Business / Community Continuity

Instant back-up power keeps lifts, pumps, lighting and amenities running through any outage.

2

Rapid Deployment

Standardized gensets and skid solutions installed and commissioned fast.

3

Flexible Capacity

Modular sizing from 500 kVA to 20 MVA — scale up or relocate as the development grows.

4

On-Site Fuel Storage

Bulk fuel tanks and managed distribution ensure extended autonomy during outages.

5

Compliant & Safe

Meets local emissions, noise and electrical-safety standards for residential zones.

6

Rental & OPEX Model

Rental and full-service options with guaranteed response SLAs — no capital outlay.

What changes for the client after implementation — and how TAQA delivers it, phase by phase

VALUE ADDED TO THE CLIENT

Uninterrupted Living

Residents keep power to elevators, water pumps, security and common areas during grid failures.

No Capital Lock-Up

Rental model means the developer avoids buying, owning and depreciating generator assets.

Right-Sized & Relocatable

Capacity flexes with construction phases and occupancy, then redeploys where needed.

Hands-Off Reliability

TAQA's 24/7 O&M, remote monitoring and rapid response remove the operating burden entirely.

IMPLEMENTATION TIMELINE — START TO FINISH

Green-mobility charging for residential communities — three charger lines and six end-to-end services on a full-investment model

SCOPE

EV Charging Infrastructure

TAQA Arabia holds Egypt's first EV-charging license and delivers complete green-mobility infrastructure for residential developments — engineering, supply, installation, operation and even full investment — backed by a 24/7

What we deliver

- ▶ appAC EV chargers — residential & commercial
- ▶ DC fast chargers — highways & community gateways
- ▶ Golf-car chargers — resorts, campuses & estates
- ▶ Engineering: site assessment & charger network design
- ▶ Supply, installation & lifecycle O&M (uptime support)
- ▶ Full-investment profit-share model,

VALUE PROPOSITION

1

First EV License in Egypt

TAQA holds the first private EV-charging license in the country — a genuine first-mover advantage.

2

Full Charger Range

AC, DC fast and golf-car chargers cover every residential and resort mobility need.

3

Full-Investment Option

TAQA can fund the entire network under a profit-share model — zero capex for the developer.

4

Turnkey Engineering

Site assessment, design, supply and installation delivered end-to-end by one partner.

5

Lifecycle O&M & Uptime

Ongoing operation and maintenance keep every charger available and revenue-generating.

6

Hotline & Mobile App

24/7 TAQA hotline plus a user and operator app for seamless charging and management.

What changes for the client after implementation — and how TAQA delivers it, phase by phase

VALUE ADDED TO THE CLIENT

Future-Proof Amenity

EV-ready parking is now a deciding factor for buyers — it differentiates and future-proofs the community.

New Recurring Revenue

The profit-share model turns charging into an income stream shared with the developer.

Zero Capex Entry

Full-investment option lets developers offer charging without funding the hardware or installation.

Effortless Resident Experience

App-based charging, transparent billing and a 24/7 hotline make adoption simple for residents.

A show of muscle — what TAQA Arabia has already delivered

First EV License — Green Mobility

Pioneering Egypt's EV-charging rollout from the front

TAQA Power secured the first private EV-charging license in Egypt and is rolling out AC and DC charging across residential, commercial and highway locations, supported by its own operator and user mobile app and 24/7 hotline. As Egypt's largest private power player, TAQA pairs charging with on-site solar and distribution — a complete green-mobility package for any community.

Why One Partner: The TAQA One-Stop-Shop

One SLA, one communication point, one accountable operator — across every utility in the community

From Fragmented Vendors to a Single Operator

One SLA

A single service-level agreement governs gas, power, water, back-up and EV — one uptime guarantee, one penalty regime, one renewal.

One Communication Point

A single account team and 24/7 hotline for every utility — no chasing five contractors when something needs attention.

One Commercial Relationship

Consolidated billing, aligned contract terms and a single negotiation instead of six separate procurement cycles.

One Engineering Standard

Utilities designed to interoperate from day one — shared trenches, shared metering platform, shared monitoring.

One Accountable Owner

End-to-end responsibility removes interface risk and finger-pointing between specialised vendors.

The Power of the Bundle: Cross-Solution Benefits

How combining the solutions under one SLA creates value no single vendor can match

Solar + Desalination

On-site solar PV powers the RO plant — Egypt's first eco green desalination model, cutting both energy cost and CO₂.

Solar + EV Charging

Community solar feeds EV chargers, lowering charging cost and maximising the green-mobility story for residents.

Distribution + Smart Metering

One metering platform bills electricity and water together — shared infrastructure, single resident app.

Gas + Mobile CNG

Mobile CNG bridges supply until the permanent gas network goes live — seamless handover, no diesel gap.

Diesel + Distribution

Back-up gensets integrate directly into the TAQA-built distribution network with automatic transfer — true redundancy.

Shared O&M & Monitoring

One control room and field team monitor every utility — pooled spares, pooled response, lower unit O&M cost.

Sold as one SLA: lower combined cost · shared infrastructure & trenches · one billing & monitoring platform · stronger ESG / green-rating story · single accountable operator for the entire community utility backbone.

Success Story: Soma Bay

A single destination running on multiple TAQA solutions — the one-stop-shop, proven

Egypt's first & largest eco solar-powered desalination plant

At Soma Bay on the Red Sea, TAQA Arabia integrated solar generation, power distribution and reverse-osmosis desalination into a single, renewable-powered utility system — using technology that consumes 50% less power than its peers. It is the clearest proof of the bundled, one-SLA model serving a residential and touristic destination.

Solutions combined on one site:

- Solar PV
- Power Distribution
- Water Desalination
- Smart O&M
